-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 3653

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6 and 7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 appears to be inaccurate in defining the slide is adapted to force the vial into a position parallel to the slide as the vial leaves the receptacle through the narrow (second) opening. It is the flap which applies pressure to the vial at such point that is described and shown to force the vial into parallel position with the surface of the slide.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3653

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1 through 5, 9, 10, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Guerra et al '563 (cited by applicant) in view of Tobias.

Guerra et al '563 teaches an apparatus for dispensing vials comprising : a receptacle (part of support assembly 18 formed by walls 106a-d, see Fig. 5) with a first opening and a second opening and a slide extending below the second opening to allow a vial to slide downwardly away from the receptacle to be received on a support surface 116.

Guerra et al '563 fails to teach providing a flap pivotally attached to the receptacle near the second opening to contact the vial as the vial leaves the second opening and exert pressure on the vial as it moves down the slide.

Tobias teaches providing a flap 30 mounted so as to contact a container as it moves down slide from a receptacle (see Fig. 2) thereby exerting a pressure on the container in order to insure a smooth deposit of the container on a support surface.

In view of the teachings of Tobias, it would have been obvious to one of ordinary skill in the art to provide a flap pivotally attached to the receptacle near the second opening to engage a vial (container) as it leaves the second opening and moves down the slide to insure a smooth deposit of the vial onto support surface 116.

Art Unit: 3653

6. Claims 8, 11, 14 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 6 and 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. Claim 16 is allowed.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Quimper and Newman et al are cited to show various arrangements of receptacles and slides for the dispensing of containers to a support surface. The Japanese patent document number 52-37096 is cited to show an arrangement of a flap engaging a container to aid in proper dispensing of a container to a support surface.
